

BEAM Plus Consultancy Services for Proposed Composite Development (Commercial & Residential) at 310-310C Un Chau Street, Kowloon

CLIENT: PO SHING CONSTRUCTION LIMITED

LOCATION: HONG KONG

DATE: SEPTEMBER 2017 - AUGUST 2018

TAGS: GREEN BUILDING, ENVIRONMENTAL
CONSULTANCY SERVICES

Background

The proposed composite development at 310-310C, Un Chau Street, Cheung Sha Wan (the Project) is a development of a 25-floor building where the ground floor is for the commercial use and the remaining floors for residential use. Each floor contains 4 to 6 units. This Project is expected to be certified under BEAM Plus New Building (NB) Version 1.2 green building scheme.

Our Roles

ANewR provides quality BEAM Plus consultancy services to Po Shing Construction Limited to facilitate the compliance with relevant BEAM Plus credit requirements during the construction phase of the Project. We help our Client to prepare and coordinate various BEAM Plus submission materials, give advice on green construction practices such as minimising the use of resources, waste production, and selection of green building materials.

Key Values to Client

ANewR provides guaranteed services to support our Client's Projects and to acquire relevant BEAM Plus credits so as to ultimately help this project to achieve a higher environmental standard, maximise the living comfort and raise its competitiveness in the market.
